Career Objective

Results-driven Software Engineer specializing in Flutter development, with solid experience contributing to backend systems using NestJS, Django, and Firebase. Committed to building scalable, maintainable solutions and delivering high-quality user experiences.

Work Experience

Senior Software Engineer
AGAM International (BD) Limited
Gulshan, Dhaka, Bangladesh.
August 2025 – Present

- Maintain and enhance production Flutter applications, ensuring stability, performance, and scalability across releases.
- Design and improve system-level architecture and backend workflows to support new features and long-term maintainability.
- Collaborate closely with cross-functional teams to optimize application and server-side performance using efficient state management and architectural best practices.
- Develop, integrate, and maintain backend APIs, handling debugging, major updates, and service enhancements using Django and Firebase.
- Contribute to writing clean, well-structured, and well-documented code aligned with modern engineering standards.

Software Engineer
Sheba Fintech Limited
Banani, Dhaka, Bangladesh.
July 2024 – August 2025

- Maintained and enhanced Flutter codebases to improve stability, performance, and scalability across production apps.
- Maintained and enhanced production Flutter apps, improving stability, performance & scalability.
- Collaborated with cross-functional teams to improve application responsiveness and user experience using efficient state management and architectural best practices.
- Assisted with backend development tasks, including API integration, debugging, and service updates using NestJS and Firebase.
- Contributed to maintaining code quality and reliability across mobile and backend components.

Software Engineer (Flutter)
Bringin Technologies Limited
Dhaka, Bangladesh.
December 2022 – July 2024

- Developed a scalable Flutter application with proper state management and RESTful API.
- Refactored legacy code to improve performance and maintainability.
- Integrated Socket.io for real-time data updates and Agora SDK for voice and video call.

Flutter developer
Code Village
Dhaka-1230, Bangladesh.
May 2022 – November 2022
- Built and maintained scalable Flutter apps with effective state management and RESTful API.
- Developed reusable components and UI modules for consistency and code reuse.
- Worked in a collaborative Agile environment, delivering through iterative development sprints

Technical Skills

Mobile App Development
- 4+ years of professional experience building cross-platform mobile applications using Flutter
- Specialized in advanced integrations, including Google ML Kit face detection & liveliness verification
- Implemented push notifications using Firebase Cloud Messaging (FCM) across Android and iOS
- Designed and configured deep linking and app routing for both Android and iOS.
- Hands-on experience with state management solutions such as GetX, Riverpod, and Provider
- Strong focus on Clean Architecture, SOLID principles, and writing scalable, maintainable code
- Integrated third-party services including Google Maps API, Agora SDK, and payment gateways
- Managed full app configuration and production deployments, in App Store & Google Play Store

Backend Development
- Developed and maintained scalable server-side applications using NestJS and Django
- Proficient in REST API design, versioning, and documentation using Swagger
- Worked with cloud-based databases such as Firebase, Firestore and MongoDB
- Experienced with SQL-based databases, including MySQL and PostgreSQL

Programming Languages
- Proficient in Dart, TypeScript, JavaScript, and Python
- Currently practicing Go (Golang) at an early stage

Dev Tools & Technologies
- Tools: Jenkins, Portainer, Grafana, pgAdmin, Postman, Swagger, Firebase Console, Git, GitHub
- Experience with CI/CD pipelines and deployment to Google Play Store and Apple App Store
- Implemented CI/CD workflows for server-side applications using Jenkins and GitHub Actions

Projects

CraftyBay
Flutter e-commerce app with products, cart, & auth. Explore the project on GitHub.
ProgressPal
Extensive task manager app using Flutter and Rest APIs. Discover about this on GitHub.

Other Projects
- ChatX - Real-time chat app leveraging Socket.io.
- KhaboKi - Catering and food ordering app with a NestJS backend and scalable Flutter frontend
- AskGemini - Flutter app leveraging Gemini API to answer user queries via text and images.
